LabSavvy DOCUTIZER™

Artificial Intelligence

AI

Machine Learning

Handwriting Recognition

Advanced Logic & Rules Engine

Multi-Document & Batch Processing

**Single Scan Analysis**

1 Scan

✓ Log into Docutizer.

✓ Scan requisition, insurance & demographics documents.

✓ Docutizer will extract, classify & process the order documents using AI, machine learning & more!

2 Review

✓ Scanned image of the order documents to be processed is displayed.

✓ Possible errors based on tolerances and custom rules will be flagged visually.

✓ Each order document field is highlighted as the user validates the information.
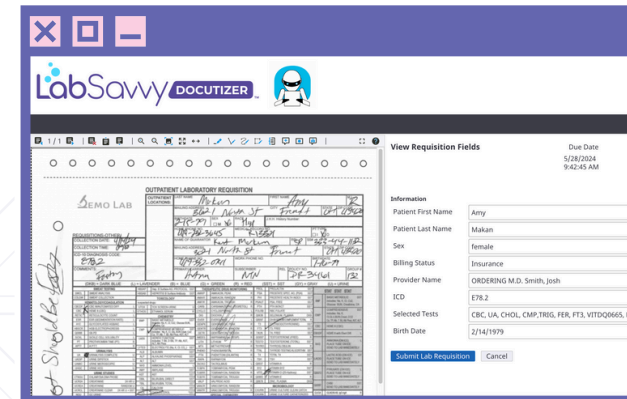

3 Submit

✓ Once reviewed simply click submit to process the order documents.

✓ Submitted order information is sent to your LIS, EMR or EHR.

✓ Information from insurance documents along with the scanned images can be electronically directed to your billing module or RCM.
