# Provider FAQ

---

## What is LabSavvyIQ?

It is a free-to-use provider and patient portal that gives providers access to nationwide laboratories and their test menu at a fraction of the cost for their patients.

## Can I access the results?

Yes, just like any EMR you can sign-in and place orders and view results via any web browser securely. This includes result tracking and trending and our 3-step order process!

## How does the patient get the results?

LabSavvyIQ has a web based and mobile app based patient portal that allows patients to pay for their blood work, schedule blood draws, and view their results. It includes an easy to interpret color coded interface, result tracking and trending and patient education.

## Does it cost me or my office anything?

LabSavvyIQ app and web platform is available at no cost to use for you the provider or the patient. All lab testing orders are sent directly to the patient for payment via a secure payment processing hosted by Stripe.

## What laboratories is blood work sent to?

We work with nationwide reference labs such as Quest Diagnostics & LabCorp. You can choose what labs you want to opt into when you sign-up.

## How much does LabSavvyIQ save my patient?

LabSavvy IQ saves patients 30% or more compared to standard or high deductible insurance rates, and 60% or more for self pay.

### Examples of LabSavvyIQ pricing:
