

Employee Wellness, Public Health & Fitness Industry Vouchers

Standard Components

This workflow allows for the processing of pre-configured laboratory testing options to be offered to customers without the use of a direct e-commerce site. Allowing the patient to register with LabSavvy using a specific registration code, and be route to your specific portal for order processing and to schedule specimen collection

Client Account

As the direct client of LabSavvy you will be provided a direct account and administrative portal. This portal allows you to view results, manage patients, and place orders. It functions like an EMR/EHR

Client Project

As a client your customers will be set-up as projects (sub-accounts) under your primary account. This allows you to view test volumes and results at a customer level, as well as manage test offerings and pricing at a sub-account level)

Project/Provider Code

Each sub-account can be assigned a specific Project/Provider code that will be used at registration to direct them to the proper test options and pricing plans you would like.

The Project/Provider code is a fully customizable alphanumeric code that can be determined by the client. This code can be utilized in any print or e-communications with patients to direct them at the point of registration.

Employee Wellness, Public Health & Fitness Industry Vouchers

Standard Components

Projects & Codes

LabSavvy will set-up the specific projects for each sub-account desired. Including required tests, price structures if applicable and any labeling. LabSavvy will then generate and provide codes specific to each project that you can be communicated to customers regarding registration.

Vouchers

LabSavvy clients will generally create paper forms, cards or e-communications that provide the registration information to access LabSavvy along with the assigned code to use at the point of registration. LabSavvy can customize the registration email notifications to be white-labeled and/or provide any specific instructions beyond the standard LabSavvy information.

QR Codes

If utilizing paper forms or cards, LabSavvy clients will generally use QR codes to direct patients to either the mobile app store or the web-hosted registration site.

Email

Clients may also do a roster based email to patients, LabSavvy also has the capability to do this for clients per project as well. There may be additional costs associated with this service, depending upon roster size and customization.
